REMARKS - General

The Applicant has modified the claims to address the Examiner's Section 101 and Section 112 rejections. Applicant has modified all Section 102 rejected claims to address the Section 102 rejection.

Applicant has added additional elements such as stored passwords which are not in the Prior Referenced Art of Beckman (US Pub 2004/0143674) or Beckman and stated combine references quoted in the Office Action.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

Respectfully submitted,

Jeffrey M. Furr, Esq.
